

QUICK FENCING RESOURCE SERIES

Get the key points you need in just a few minutes.

YOU ASKED,
SO WE ANSWER...
SHORT ON TIME?

01

PLANNING
YOUR FENCE

02

WHAT WILL
MY FENCE COST?

03

CHOOSING A
FENCE CONTRACTOR

02

WHAT WILL MY FENCE COST?

1

START WITH THE FENCE TYPE

Different materials come with different price points. Metal, cedar, aluminum and other options vary in material cost, installation and long-term maintenance.

2

KNOW YOUR APPROXIMATE LENGTH

The length of your fence is a major part of your budget. Even a rough measurement can help you understand the likely range before your consultation.

3

USE PER-FOOT PRICING AS A STARTING POINT

Approximate per-foot pricing can help with early budgeting; however, it isn't the same as a complete project quote.

- Metal — \$65/ft
- Vinyl — \$106/ft
- Deer Fencing — \$49/ft
- Composite — \$95/ft
- Cedar — \$69/ft
- Aluminum — \$109/ft
- Ornamental — \$100/ft

*depends on height & privacy level

4

YOUR PROPERTY AFFECTS THE PRICE

Slopes, bedrock, roots, access, gates, existing fencing and other site conditions can affect the work required and the final cost.

5

DON'T FORGET GATES & EXTRAS

Gates, removal of an existing fence, custom solutions and other project details need to be considered when comparing costs.

6

COMPARE THE COMPLETE PROJECT

The lowest per-foot price doesn't necessarily mean the lowest final cost. Make sure you understand exactly what is included in the quote.

At Preferred Choice Fencing, we know cost is an important part of planning your project. We'll help you understand the options, what affects pricing and what makes sense for your property and budget.
