CHOOSING A FENCE CONTRACTOR

1

LOOK BEYOND THE BOTTOM LINE

Two quotes can look similar while including very different materials, installation methods and services. Compare what you're actually getting — not just the final number.

2

ASK ABOUT MATERIALS

Find out exactly what products are being used and why they're recommended for your property. Quality materials can make a big difference in how your fence performs over time.

3

UNDERSTAND THE INSTALLATION

Ask how posts will be installed and how slopes, bedrock, roots and other site conditions will be handled. Good installation is just as important as the fence itself.

4

KNOW WHAT THE QUOTE INCLUDES

Make sure measurements, gates, removal, disposal, site preparation and other project details are clearly explained. Ask questions about anything that isn't clear.

5

PAY ATTENTION TO COMMUNICATION

A good contractor should respond to you, answer questions, explain your options and keep you informed. How a company communicates before the project can tell you a lot about what to expect later.

6

CHECK THE COMPANY BEHIND THE FENCE

Look at customer reviews, experience, warranty and after-installation support. Choose a company you feel comfortable trusting with your property.

At Preferred Choice Fencing, we believe a great fence project starts with trust. We want homeowners to understand their options, know what they're paying for and feel comfortable asking questions before making fencing decisions.
